AW139 iPad HOLDER KIT WITH USB CHARGER*

The ICARUS iPad Holder Kit allows for safe and secure installation of an iPad Electronic Flight Bag (EFB) for use in the cockpit. The kit attaches to the underside of the instrument panel (left or right side) and provides a hinged swing-out holder to which the customer owned EFB is attached. The kit allows for a completely unobtrusive stow position for when not in use, and comes with a USB power charger for the EFB. Designed to accommodate standard 10.68" x 7.80" devices. The kit is currently certified by Transport Canada. Each field installable kit comes with all materials and concise installation instructions for a single EFB. Specify left or right side installation (or both) when ordering.

FEATURES

- Forward/rear slide mechanism ensures EFB is stowed safely and within comfortable field of view when deployed;
- Stowed position does not interfere with view through window, rotor blade camera operation or flight controls;
- Self locking stowed position with single hand operated actuator to release into extended/deployed position;
- Uses gas strut to ensure solid positioning of swing-out angle;
- Three position locking for up/down tilt for best viewing angle;
- Includes charging port for user supplied USB charging cable;;
- No special tools required for installation
- Made from machined aircraft grade aluminum;
- No airworthiness limitations – 21G crash loading
- Transport Canada STC O-LSH20-069/D

*Triple port USB electrical charge kit available separately, covered by STC O-LSH20-094/D – enquire for details.

ABOUT ICARUS AEROSPACE

ICARUS Aerospace Services Inc. is a Transport Canada, F.A.A. and EASA approved design, certification and manufacturing organization that specializes in aircraft modifications, engineering services, special mission aircraft conversions, logistics support and integrated kit solutions. Facilities are located in Toronto. Contact us: info@iaero.ca for more information.
